# Skeletal Anchorage for Distalization & Expansion

These courses are aimed at giving a personalized explanation to orthodontists and orthodontic labs, who want to expand their knowledge with skeletal anchoring treatment.

Each course involves 10 hours of participation, with the combination of theoretical and practical workshops.

## Course Objective

Participants will learn how to:

- Insert mini-screws in the anterior palate
- Integrate the mini-screws with the TopJet Distalizer\*
- Integrate the anchored palatal mini-screw with the MICRO2, MICRO4 and hybrid expanders\*

\*Depends on the course main topic (TopJet Distalizer and/or Skeletal Expansion)

## Course Agenda

### 1. In-Depth Theoretical Knowledge

Communicate and explain the theoretical background to insert secured application of palatal mini-screws and skeletal anchorage.

### 2. Active Observation

Patients will be present, and treatment application will be visible with a livestream screen. All details can be closely observed guided by an orthodontist specialist. The treatment application includes mini-screws insertion and removal with the anchorage treatment.

### 3. Hands-On Workshops

Practice of mini-screws insertion on typodonts guided by specialized orthodontists. This is the most crucial step to gain practical experience.

### 4. Room for Questions & Discussion

Time to process all the new knowledge acquired, and clarify doubts. Questions to the specialists, and discussions about the cases that were presented during the course.

# Presenter

**Dr. Heinz Winsauer, Bregenz, Austria** | received his degree in general medicine from the University of Innsbruck in 1980, and completed four years of clinical training in general and intensive medicine. From 1985 he began his training at the Dental University in Innsbruck and then focused on three years of orthodontic training. He has had a private practice in Bregenz, Austria, since 1990. In 1998 he was the first Austrian orthodontist to pass the European Board exam in private practice, and since then he has been an active member of the European Orthodontic Society. Dr. Winsauer is the author and co-author of 15 peer-reviewed publications and four orthodontic textbook chapters. He is a speaker at numerous international lectures (including a pre-congress course at EOS 2017) and holds eight international orthodontic patents.
