

YOUR RETAINER WORKFLOW JUST TURNED CHAIRSIDE

Did you know that you can produce same day in-house retainers in just 20 minutes?

Unlock your full potential and let dental 3D printing elevate your aligner treatments.

A 3D printer can be the starting point for a frictionless chairside retainer workflow.

3D printing unlocks the full potential of your **MINISTAR S®** and your orthodontic treatment. Paired with the dedicated SprintRay Chairside 3D Printing portfolio, all you need to do is print your scan, thermoform your retainer and make your patients happy.
