

YOUR CROWN WORKFLOW JUST TURNED CHAIRSIDE

Did you know that your DEXIS™ scanner is the starting point for a chairside crown workflow that only takes 45 minutes? Find out yourself.

Your DEXIS™ scanner is the starting point for a frictionless chairside workflow.

3D printing unlocks the full potential of your intraoral scanner. With AI Crown design and the dedicated SprintRay Chairside 3D printed crown portfolio, all you need to do is to upload your intraoral scan and start printing.

Your benefits at a glance:

- Crown design in under 5 minutes
- 3D printed crowns in 15 minutes
- Composite-filled hybrid material for permanent restorations
- Cost per crown: £2
